History of the DSM

The DSM was first published in 1952. The DSM was based on the work of Emil Kraepelin, who developed the first comprehensive classification of mental disorders in the late 19th century. The DSM was intended to be a standardized system for diagnosing mental disorders.

The DSM was revised in 1968, 1980, 1987, and 1994. The DSM-5 was published in 2013.

The DSM has been controversial since its first publication. Critics have argued that the DSM is too narrow, that it is based on subjective criteria, and that it is biased towards certain cultures.

Despite the controversy, the DSM is the most widely used classification of mental disorders in the world. The DSM is used by clinicians, researchers, and policymakers to diagnose and treat mental illness.
