

# Epstein Barr Virus Infectious Disease and Therapy 38: An In-Depth Exploration of EBV Pathogenesis, Diagnosis, and Treatment

**SYMPTOMS OF EPSTEIN-BARR VIRUS**

**Fever**  
Fever occurs when your body temperature rises abnormally high. This is not an uncommon occurrence in both children and adults, and viral infections and illnesses often cause it. Raising the body temperature is how the immune system responds to many infections. Viruses and bacteria do not handle elevated temperatures well, and fever is the human body's attempt to kill them.

**Fatigue**  
Fatigue is exhaustion that has been gradually developing and preventing you from providing maximum performance. It is possible to experience both physical and mental fatigue, but medically it is treated as a symptom and not a medical sign. This is because fatigue is a subjective feeling that patients have. Another problem is that fatigue is related to many conditions. As for EBV, chronic fatigue syndrome may be connected to this virus.

**Sore Throat**  
Sore throat is a common symptom of the Epstein-Barr virus. However, viral pharyngitis can also be a symptom of other health problems, such as influenza. If the sore throat is related to EBV infectious mononucleosis, a doctor will administer treatment. They will likely include antiviral therapy that might not treat the pharyngitis directly, but the actual underlying cause (the virus). If necessary, you might receive corticosteroids.

**Lack of Appetite**  
Lack of appetite usually isn't the only symptom as it is often accompanied by fatigue and fever (sometimes caused by it). Hunger and satiety mechanisms are only partially understood at this point. However, an unusual lack or loss of appetite may be a sign of concern.

**Other Symptoms**  
When it comes to other symptoms of the Epstein-Barr virus, the Center for Disease Control mentions that they can include swollen lymph nodes in the neck and liver, as well as an enlarged spleen and even rash. You may also feel general weakness and your muscles might feel sore.
