

Fractal Flames: Simple Joy White - A Journey into the Beauty of Fractal Art

What are Fractals?

Fractals are mathematical objects that exhibit self-similarity. This means that they have the same basic structure at all scales. Fractals can be found in nature, such as in the branching of trees and the coastline of a beach. They can also be created artificially, using computer programs.

Fractal Flames

Fractal flames are a type of fractal that is created using a computer program. The program uses a set of rules to determine the color of each pixel in the image. The rules are based on the distance between the pixel and a set of seed points.

Fractal flames can be very complex and beautiful. They can resemble natural objects, such as clouds, mountains, and trees. They can also be abstract and psychedelic.
