- Declining test scores
- Increasing achievement gaps
- A shortage of qualified teachers
- Outdated curriculum and instructional materials
- Inadequate funding

These challenges are complex and there is no easy solution. However, there are a number of promising practices that have been shown to improve student outcomes. These practices include:

- High-quality teaching
- Rigorous curriculum and instructional materials
- Effective assessment
- Technology in education
- Teacher training
- Parent involvement
- Community engagement

Policymakers, educators, and parents all have a role to play in improving American education. Policymakers can provide funding for promising practices, set high standards for schools, and hold schools accountable for results. Educators can implement promising practices in their classrooms and schools, and work to create a positive learning environment for all students. Parents can support their children's learning at home and advocate for policies that improve schools.

By working together, policymakers, educators, and parents can help American schools get better at getting better. The following recommendations provide a roadmap for improving American education:

- Invest in high-quality teaching.
- Develop and implement rigorous curriculum and instructional materials.
- Use effective assessment to track student progress and inform instruction.

- Integrate technology into the classroom to enhance learning.
- Provide teachers with ongoing professional development.
- Encourage parent involvement in schools.
- Partner with community organizations to support students and families.
- Set high standards for schools and hold them accountable for results.

By implementing these recommendations, American schools can get better at getting better and provide all students with the opportunity to succeed.

About the Author

John Smith is an education researcher and policy analyst. He has written extensively on a variety of education topics, including school improvement, teacher quality, and curriculum development.
